

Golden Stars Votive Holder

Requirements:

Variety of DFN metallic floss colors
rubber cement
tacky glue
brass votive candle holder
star shaped acrylic jewels

Unleash Your Creativity With DFN

Instructions:

Starting at the very bottom of the votive candle holder, apply some rubber cement and wrap 5 rounds of the silver metallic floss. Neatly press the end into the rubber cement. Start the rounds of the copper metallic floss by firmly pressing the end onto the rubber cement, where the silver ends. Wrap three rows of copper then neatly end it. Turn the candle holder upside down. Carefully apply a thin line of tacky glue to the top edge of the candle holder and attach 1 row of copper to it. Now choosing white and gold stars apply them neatly to the side of the candle holder in a random pattern. The candle holder we chose had stars cut out in the design, which accentuated the jeweled stars.
