

Our Commitment to Product Safety

The safety of our products is of the highest importance. From development to production the quality and safety of our products is a primary focus. As a result of our strict standards we have a 30 year proven track record of quality products without a safety issue or product recall.

Janlynn produces products both in the United States and facilities overseas. It is our policy to ensure all government standards including the new CPSIA are adhered to. We believe there is no substitute for safety. Every supplier that we work with both domestically and internationally must adhere to these safety and ethical standards. Janlynn also requires that a third party testing facility evaluate all products coming from our overseas factories. We test each individual component, many of which are used across multiple products, to ensure they meet all US safety standards including those for lead and phthalates.

Whether you purchase a Janlynn product Made in the USA, Assembled in the USA, or produced by one of our international partners, you can be assured that we provide a quality product that will offer a safe creative experience.
