

# TERRA COTTA CANDLE HOLDER

Designed by Alexandra Torra

## Materials:

- 3 Complimentary Colors of DFN Craft Thread
- Terra Cotta Candle Holder
- 9 Decorative Stones
- Tacky Glue

## Instructions:

1. Evenly space and glue the 9 stones around the top part of the pot.

2. Carefully apply a thin line of glue over and under alternating stones, circling the last bead before returning to the starting point (refer to diagram). Attach craft thread to glue line. Glue ends carefully. Allow to dry.

3. When dry, apply glue in thin lines around the clay pot. Apply the craft thread in bands of color. Try to be sure

the craft thread lays as flat as possible and covers the clay pot. Always start and stop the craft thread on the same side of the pot. Make sure the ends are glued down. Let dry completely, and you're done!

4. Use a tea light or a small votive candle. When using a votive candle, prevent wax leakage by lining the bottom inside portion of the pot with aluminum foil.

**Most Important....don't leave a burning candle unattended.**
