

## *Turn Boring Clips into Beautiful Accessories!*

Materials: Plain metal hair clip

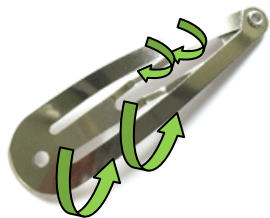

Cool Cord Floss

Glue (we used a hot glue gun)

1. Cut about 2 feet of Cool Cord floss. Unsnap the hair clip. Tie one end around the middle part of the clip indicated by the green dot below.

2. Wind the floss around the outside parts of the clip.
  - Make sure to be consistent with how tightly you pull the floss.

3. When you finish coming back up the second side of the clip, tie the end around the middle part of the clip as well. Cut off the excess cord.
4. Put a spot of glue on the remaining exposed metal and place the remaining cord in a spiral shape.

***You're done!***

You've turned a boring metal hair piece into an accessory all your friends will admire! And with how simple these are to make, you can make them for everyone.
